🔗 [Bold Profile](#)

## PROFESSIONAL SUMMARY

Business-minded Network Administrator with [8] years of experience in supporting server environments. Determined and focused in managing network infrastructure and optimizing environment while reducing redundancy. Considered expert in troubleshooting complex problems and reaching innovative solutions while adhering to rules and requirements of project scope. Dynamic team player when interfacing with other staff members, vendors and end-users.

## EDUCATION

The Polytechnic, Ibadan  
Ibadan, Nigeria • 04/2020

**HIGHER NATIONAL DIPLOMA:**  
COMPUTER SCIENCE

## SKILLS

- Network protection strategies
- Wireless communication protocol
- Surveillance system installation
- Mikrotik configuration
- CISCO networking expertise
- CISCO Packet Tracer simulation skills
- GNS3 network simulation skills
- Nginx configuration management
- JavaScript proficiency
- Web markup language proficiency
- Web design using CSS
- Node.js development
- PHP programming
- Database management using MySQL
- Proficient in Python
- Experience with AutoCAD software
- Electrical systems expertise

## WORK HISTORY

**Golden Tulip - Network Administrator Manager**  
Ibadan, Nigeria • 01/2020 - Current

- Designed and planned network infrastructure to meet the specific needs of the organization, including considerations for scalability, security, and performance.
- Set up and configured network devices (routers, switches, firewalls, etc.) and ensured they operated correctly.
- Diagnosed and resolved network issues, from minor connectivity problems to complex security breaches.
- Monitored network performance, identified potential problems, and performed routine maintenance to ensure optimal network health.
- Implemented and maintained network security measures to protect against unauthorized access and cyber threats.
- Documented network configurations, procedures, and troubleshooting steps for future reference.
- Performed day-to-day LAN and WAN administration, maintenance, and support.
- Assisted IT staff with troubleshooting issues and closing calls.
- Improved network efficiency by implementing and managing system updates and patches.
- Maintained network hardware and software and monitored the network to support availability for end users.
- Enhanced network security through installation, monitoring, and maintenance of firewalls and antivirus software.
- Managed data backups and disaster recovery operations in line with business continuity initiatives.
- Maximized uptime by performing routine maintenance on servers, switches, routers, and other networking equipment.
- Optimized server performance by conducting regular audits, identifying areas for improvement, and implementing necessary upgrades.

**GALLOOLI - Site Engineer**  
Lagos, Nigeria • 01/2013 - 01/2019

- Installed and configured RMS devices infrastructure, including

## CERTIFICATIONS

**Cisco Networking Academy - Ethical Hacker**(Student Level Credential) -

Completed: June 2025

- Covered ethical hacking methodology,penetration testing, vulnerability scanning, social engineering, exploitation of wired/wireless & application-based vulnerabilities, and post exploitation reporting.

**NCLP10 - Novell Certified Linux Professional 10**

Completed May 2023

- Covered navigation of Linux environment,performing basic system administration,troubleshooting common problems, securing and maintaining a Linux-based system.

**CCIE - Cisco Certified Internetwork Expert**

Completed February 2024

- Hands-on mastery of Cisco enterprise solutions
- Dual-stack (IPv4 and IPv6) architecture
- Routing protocols: OSPF, EIGRP, BGP, MPLS, IS-IS
- Network automation and programmability (Python, APIs, NetConf/YANG)
- Software-Defined Networking (SDN): Cisco DNA Center, SD-Access
- Infrastructure Security
- QoS (Quality of Service)
- Network Assurance and monitoring

connectivity, device gateway, and platform.

- Installed and configured RMS GUI, and connected it to the backend.
- Conducted feasibility studies and developed concepts for the RMS project.
- Provided technical guidance and support to the development team during implementation and testing.
- Conducted system performance tests and troubleshoot issues at the RMS site.
- Monitored and analyzed the RMS ecosystem and made recommendations for optimization and enhancement.
